Hong Kong International Airport - Lucky Draw Website

In 2021, there were lots of corporates wanted to promote vaccination by holding lucky draw, HKIA was one of them. This website is designed in Photoshop and build with Webflow. Then pure coding was exported from Webflow and imported to github for server testing.

To support the HKSAR Government's COVID-19 Vaccination Programme, the Airport Authority Hong Kong (AA) sponsors **50,000 air tickets*** to be given away by lucky draws organised by Cathay Pacific and HK Express to Hong Kong residents who have completed the COVID-19 vaccination.

Potential participants are advised to seek medical advice before vaccination, and when ready, book for their COVID-19 vaccines via the Government's website at www.covidvaccine.gov.hk.

* Taxes and surcharges not included.

Hong Kong Marine Department - Feature Website

Joining the maritime industry

The maritime industry in Hong Kong provides various job opportunities. Aspiring talents are welcome to join and become maritime professionals.

Those interested in taking up a seafaring career should first choose to work in the deck or engineering departments. By obtaining professional qualifications and accumulating experience, the crew members of local vessels, river trade vessels and shipping vessels may be gradually promoted to higher ranks in a well-structured manner. In addition, those who are interested in operating local pleasure vessels for a living should obtain the required qualification by taking the examinations for the Pleasure Vessel Operator Certificates of Competency.

After accumulating sufficient experience and holding appropriate professional qualifications, crew members may consider joining the Marine Department to realise their potential or taking up careers in portage, ship management, maritime law consulting and other related fields.

Promotion progress

Promotion path for deck crew:

- Rating → First officer (First mate/Second officer or Third officer right-rank officer, etc.) → Marine officer

Promotion path for engineering crew:

- Rating → Marine engineer officer (Chief engineer/Second engineer, engineering watchkeeping officer, etc.)

Promotion path for local pleasure vessel operators:

- May take charge of pleasure vessels that are not more than 12 m in length and not exceeding 100 passengers in Hong Kong waters → May take charge of any pleasure vessel operating in Hong Kong waters

Introduction of Marine Department posts and vacancies

Local Vessels

Deck crew

The deck department is responsible for ensuring safe navigation of vessels, safe handling and maintaining cargo on the vessels in port condition. The ranks of deck officers include master mariners, chief mates, second mates/third officers, as well as night deck officers.

To become a deck officer one must first complete recognized maritime courses and other training and service as a cadet in the deck department to receive relevant training. After acquiring sufficient job service experience, the officer may apply for the respective examination for the Certificate of Competency (Deck Officer) Class I, and be eligible to serve as night mate officer, third officer or second officer. After accumulating sufficient job time, the officer may apply for the examination for Class 2 and then Class 3 certificates, upon obtaining the Class 3 certificate, the officer is eligible to serve as a master mariner.

The charts show the promotion paths for deck officers on board local, river trade and shipping vessels.

Local Vessels

River Trade Vessels

Shipping Vessels

General Ratings

• Engine ratings may apply for maturity through the Maritime and Port Authority's General Rating Scheme.

Completion of specified short learning courses

Introduction of Marine Department posts

The professional grades in the Marine Department include Marine Officer, Surveyor of Ships and Shipping Safety Officer, who are responsible for various aspects of posts. Other posts include Assistant Ship Inspector, Assistant Marine Controller, Marine Inspector (Surveyor), etc.

Hong Kong International Airport - HKIA Career Expo

In 2015, HKIA wanted to hold a career expo. The design aim was to create a website and let people know the event's time and date. All companies information and job requirements were posted on the website. The website needed to be responsive and user friendly.

CAREER 職業博覽會 EXPO2015

Seize the Opportunity for Success

Developing our aviation industry is critical to strengthening Hong Kong's status as an international aviation hub. To help give the industry the resources it needs to grow, Airport Authority Hong Kong and the Labour Department are once again organising the popular "Hong Kong International Airport Career Expo", which will provide more than 100 jobs for those who are interested in a future in the aviation industry. Existing opportunities include freight services, aircraft maintenance, air freight, airport security, baggage delivery, retail, technical services, mechanical engineering and catering.

The Expo will provide [free career talks and seminars](#) on the latest news in aviation, including technology, aircraft safety and more.

HK Airport Authority Staff Club - Website Revamp

The screenshot shows the original website design. At the top, there's a navigation bar with links for 'About Us', 'Activities', 'Interest Groups & Sub-Committees' (which is highlighted in yellow), 'Photo Album', 'Resort House', and 'Special Offers'. Below the navigation is a large group photo of staff members. Underneath the photo are two sections: 'Latest News' (with a megaphone icon) and 'Sports Interest Groups' (with a soccer ball icon). The 'Sports Interest Groups' section lists activities like Badminton, Basketball, Bowling, Running, Soccer, Tai Chi, Tai Chi Fan, Tennis, and Yoga. Below that is a 'Non-Sports Interest Groups' section (with a heart icon) listing Christian Fellowship, Music, and Social Service. A footer at the bottom features a decorative border with icons related to sports and travel.

HKAA Staff Club needed to revamp their website in energetic and attractive manner.

The screenshot shows the updated website design. The layout is similar to the original, with a navigation bar at the top and a large group photo below it. The 'Interest Groups & Sub-Committees' link in the navigation is still highlighted in yellow. The 'Special Offers' section is more prominent and detailed. It includes a sub-menu with tabs for 'Shopping', 'Dining' (which is highlighted in yellow), 'Entertainment', and 'Others'. Below the tabs is a table showing offer details: Post Date, Name, Offer Start Date, and Offer End Date. The table entries are: 06-Jun-2013 Pelle Borsa (Offer End Date: Until Further Notice); 14-Mar-2013 Joy & Peace (Offer End Date: 31-Dec-2013); and 18-Sep-2013 ROLEX (Offer End Date: Until Further Notice). A disclaimer at the bottom states: "Disclaimer: Airport Authority Hong Kong ("AA") is neither vendor nor service provider, and shall not bear liability for the products or services listed in "Special Offers". The footer features a decorative border with icons related to sports and travel.

Hong Kong International Airport - Three Runway System Newsletter Website

 三跑道系統專訊
3RS Bulletin

香港國際機場三跑道系統刊物 A newsletter on HIA's Three-Runway System

繁體 | 簡体 | ENG

Download PDF 

Issue 01 December 2012

- Planning of Three-Runway System commences
- Reaching out in every way
- HIA at a glance
- A green airport
- Contact us

Issue 01, December 21, 2012

We are delighted to introduce our new publication, 3RS (Three-runway system) Bulletin, one of our many communication tools keeping stakeholders abreast of the planning of the 3RS of Hong Kong International Airport (HIA). In each issue, we will provide updates on various aspects of the project, including progress of the Environmental Impact Assessment (EIA) study and stakeholder engagement activities.

As always, we value your opinions and welcome your feedback. Please visit our dedicated website www.threerunwaysystem.com for more information and to leave your comments and suggestions.

PLANNING OF THREE-RUNWAY SYSTEM COMMENCES

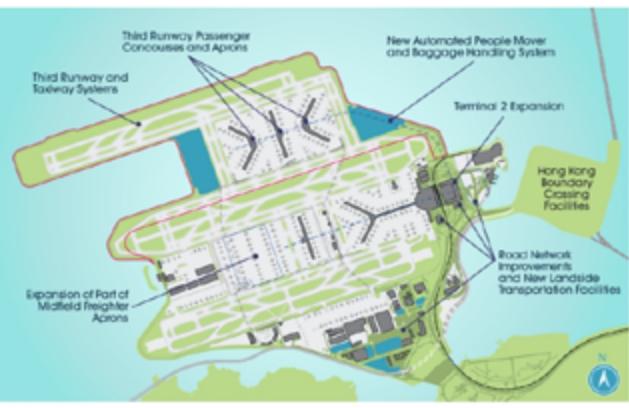

With government's in-principle approval, we are looking at expanding HIA into a three-runway system (TRS) to cope with increasing air traffic and meet future demand growth. Increasing HIA for growth is not only important to strengthening Hong Kong's status as a regional and international aviation centre, but also crucial to the sustainable growth of Hong Kong's economy.

The project will be carried out in three phases. If everything proceeds according to the plan, it will take about 11 years before the three-runway system can begin operation. Operating as a three-runway system, HIA will be able to meet the forecast traffic demand in 2030: 87 million passengers, 8.9 million tonnes of cargo and 662,000 flight movements a year.

The three-runway system will be carried out in three phases:

Phase 1	Phase 2	Phase 3
Project Planning	Project Approval	Project Implementation
ABOUT 2 YEARS	ABOUT 1 YEAR	ABOUT 8 YEARS

Tentative Layout of the Three-Runway System

Third Runway and Taxiway Systems
Third Runway Passenger Concourses and Aprons
New Automated People Mover and Baggage Handling Systems
Terminal 2 Expansion
Hong Kong Boundary Crossing Facilities
Expansion of Part of Midfield Freighters Aprons
Road Network Improvements and New Landside Transportation Facilities
Potential Land Formation Footprint for the Proposed Airport Expansion
Areas Reserved for Aviation Support Development

Privacy Policy | Disclaimer | Terms of Use | © Airport Authority Hong Kong. All Rights Reserved.

Font Size 

Based on the 3RS programme's theme and manner. The website layout could be extendable so that users can have a long paragraph and would not affect the website layout.

Issue 01, December 21, 2012

REACHING OUT IN EVERY WAY

Hong Kong International Airport (HIA) is the airport for the people of Hong Kong. We therefore find it important to make the Environmental Impact Assessment (EIA) process highly transparent by engaging a wide range of stakeholders. As of November 2012, over 100 community organisations and individuals from across the city and surrounding regions have joined HIA to foster understanding and seek voices on the future growth of HIA. Such efforts to engage various stakeholders will continue as we proceed to different planning and development stages of three-runway system project.

Technical Briefing Groups (TBGs)

We have set up four TBGs comprising professionals and experts with technical expertise and interests in specific environmental issues, including noise, air quality, marine ecology and fisheries, and Chinese White Dolphins. Through the TBG meetings, we will update and answer information on the impact on many technical aspects of the project and seek their advice and recommendations. The first meeting of TBGs took place between September and early November. The proceedings and summary of discussions at each TBG are available at the dedicated three-runway system website.

Community Liaison Groups (CLGs)

The CLGs serve as a platform to exchange views with community leaders on airport development. Five CLGs have been formed in neighbouring districts of the airport island, Kowloon, Tung Chung, Tsuen Wan and Tuen Mun with a total of over 150 members. The first round of CLG meetings took place in October. The participants and summary of discussions at each CLG are available at the dedicated three-runway system website.

Airport visits and briefings for students

To enhance students' understanding of the importance of the future airport development and our commitment to being the greenest airport in the world, we have arranged briefings and airport visits for university and secondary students. In the last academic year between September 2011 and August 2012, around 4,400 students took part in these activities. In the new academic year that started in September, over 200 invitations have been extended to secondary schools and universities to visit the airport.

Exhibitions

Exhibitions have been set up at HIA Tower and Gate 30 of Terminal 1 to provide passengers and the public with information on HIA's future development plans.

Dedicated three-runway system website

Related information such as publications, press releases and videos are available at www.threerunwaysystem.com.

Publications

Leaflets and newsletters are designed to update stakeholders on HIA's latest developments.
